Miss Gertrude Campbell Weds.

"Braethorn Cottage, Mt. Lake Park, Md., was the scene of an ideal June wedding, when at 6 o'clock p. m., Wednesday, June 16th, Miss Gertrude Campbell, only daughter of Dr. and Mrs. J. Lockhart Campbell, and distinguished for her beauty of person and character, became the bride of Mr. William Vernon Thraives, of Amelia county, Va., now well established in the practice of law at Nowata, Oklahoma. The ceremony was performed in the Episcopal church, of Norfolk, Va. The bride, who entered on the arm of her father to the strains of the wedding march from Lohengrin, played by her cousin, Miss Katherine Glass, looked superb in a gown of white messaline and trimmed with lace inherited from England and more than a hundred years old. Her ornaments were old pearls. Her veil was caught with lilies of the valley and her shower bouquet was of white roses and lilies of the valley.

Miss Alma Thraives, the maid of honor, wore pink messaline and carried white roses. Misses Francis Campbell, Mary Baxter, Lena Gore and Gertrude Thompson, the bridesmaids, wore white lingerie dresses and carried pink sweet peas.

The ribbon girls were Misses Mattie Thraives, Estelle Crawford, Edith Sissous and May Getz. The bride's mother wore gray satin and lace.

The groom entered with his best man, Rev. Powhatan James, who came on with him from Oklahoma. The ushers were Messrs. Oscar Thraives, Walter Gore, S. B. Harrison, and Dr. Harry Patterson.

Braethorn was handsomely decorated with cut flowers and plants from the green house of The H. Weber & Sons Co., of Oakland, out of compliment to the bride, who received many beautiful gifts of cut glass, silver and china. After an Eastern trip and a visit to the Thraives home in Amelia county, Va. Mr. and Mrs. Thraives will be at home in Nowata, Oklahoma. They have entered upon life together under most auspicious circumstances. Smiling June skies and the presence of many friends who have been enjoying the hospitality of Dr. and Mrs. Campbell for the past week in true old Virginia style, have lent their cheer to this union of two members of well-known old Virginia families. —Oakland, Md., Republican.

Miss Campbell is a native of Woodstock where she has a host of warm friends. She left here about six years ago with her parents, Dr. and Mrs. J. L. Campbell, for Mt. Lake Park, Md.

Superintendent of Schools.

The Division Superintendent of Schools for Shenandoah county, will probably be appointed to-day. The increased salary causes the office to be sought after. Strenuous efforts have been put forth to capture the prize. The aspirants are El. J. B. McInturf, present incumbent, and Rev. L. V. Smith, of Strasburg, and Mr. C. V. Shoemaker, Principal of the Edinburg High School. The school board have been very reticent about appointments, but the opinion of many, as far as we have been able to ascertain it, is that the contest is between Messrs. Smith and Shoemaker. Mr. Smith is well known especially in the lower end of the county. The writer does not know Mr. Shoemaker, but has heard him very favorably spoken of, and he is said to be a very successful educator. The only objection to his appointment which we have heard urged is that he has been a resident of the county but a very short time and is not therefore of the county, as those who have resided here for a longer time. The matter will probably be disposed of to-day, too late for us to announce it, in this issue.

World's Largest Barometer.

The largest barometer in the world is in the city of Florence, Italy. It is a monument to Torricelli, inventor of the barometer, who was born in that city 300 years ago. The scale of this barometer is on a basis of feet where the ordinary barometer is measured in inches. The liquid column is thirty-seven feet high at normal. It was fitted to use a thirty-two foot column of water, but this was abandoned because water evaporated too quickly. Then glycerin was tried, but with this liquid the normal height was only twenty-seven feet, which was not enough. Olive oil was chosen finally. The tube rests against a monumental pillar of stone. Olive oil is the lightest liquid yet used for a barometer. When a lighter one is made available a taller barometer may be constructed. Pascal made barometers of water and wine mixed. Zophar Mills of New York made a glycerin barometer, and Jauber set up one of water in the famous Tour St. Jacques, the weather bureau center of Paris—Detroit Free Press.
